Beehive for bumblebees type T1

Price	**15,00 Euro**
Availability	**Available**
Manufacturer	**Cultural Farm BioDar**

Product description

A larger model of a beehive for bumblebees intended for hobby breeding of these beautiful insects in gardens.

The bumble bee population in has been decreasing for many years, many species are threatened with extinction, and some have not been seen for years. We can counteract this by installing beehhives for bumblebees in our gardens and flowerbeds. The installation of the house will also positively affect the pollination of flowers.

Beehive can be opened thanks to the opening roof. You can clean the nest after the season (late autumn or winter) when the bumblebees will stop flying. This will allow to remove any parasites from the box that may have invaded after the outlet of the bumblebees and prepare it for the next season.

The beehives settled just above the ground are also eagerly settled, which are mounted at a height of over 2m. Therefore, you can put them on a hardened band around the house, assemble in the branches of trees, or under the eaves of the house, balconies, or garage.

Material:
Wood

Dimensions:

- height 13 cm,
- width 21 cm,
- depth 28 cm.

Weight:
2.3 kg

Finish:
Beehive is painted with a wood impregnate that is harmless to bees.

The colors in the picture may differ from the actual colors of the product.

This product has additional options:

Color: Clear , Dark brown

Producer

Cultural Farm BioDar implements its mission using the rich scientific achievements of the Institute of the Heritage of Villages and Regions and extensive cooperation with non-governmental organizations.
The protection of natural and cultural heritage is an important sphere of the Farm's activities, and one of the basic goals is to

preserve biodiversity and breeding useful organisms that can be used in agriculture and horticulture.

Since 1989, we have been implementing a program for implementing of bumblebees and solitary bees for horticulate practice and since 2012 the company has been running its own breeding of solitary bees on a commercial scale. By participating in the creation of biological progress, we respond to the high demands placed on by food consumers and our customers in the field of high quality of offered products and the safety of their use.

The farm is part of the regional biodiversity conservation center. In this area of engagement, it runs conservation collections of crops with high biological value (historical varieties of agricultural, vegetable and fruit plants). In cooperating organic farms, it also oversees collections of medicinal, herbal and melliferous plants. Similar works are carried out for the protection of rare and endangered plants.

The sphere of cultural heritage includes products decorated in a way characteristic for different cultural groups. The high quality of our products is appreciated by very demanding customers. Their valuable remarks make the farm's offer constantly replenished and the products are perfected.
