Manufacturer	**Cultural Farm BioDar**

Product description

Hatching cassette

The cassette is used to give shelter to the cocoons, for the incubation of bees and elimination of parasites. It is built of wood, and its internal structure helps recognise parasites, which can occur in the bee cocoons, preventing from their coming out (e.g. bee fly *Anthrax anthrax*).

Material:
For the construction of the hatching box, wood was used as a durable, aesthetic material and very well accepted by bees. Its choice is also justified by good acoustic and thermal insulation that positively influences the biological processes occurring during the hatching of insects.

Dimensions:

- height 6 cm,
- width 30 cm,
- depth 22 cm.

Finish:
the cassette is painted with a colorless wood impregnate that is harmless to bees.

Colors:
pine (clear varnish) or brown
The colors on the picture may differ from the actual colors of the product.

Producer

Cultural Farm BioDar implements its mission using the rich scientific achievements of the Institute of the Heritage of Villages and Regions and extensive cooperation with non-governmental organizations.
The protection of natural and cultural heritage is an important sphere of the Farm's activities, and one of the basic goals is to preserve biodiversity and breeding useful organisms that can be used in agriculture and horticulture.

Since 1989, we have been implementing a program for implementing of bumblebees and solitary bees for horticulate practice and since 2012 the company has been running its own breeding of solitary bees on a commercial scale. By participating in the creation of biological progress, we respond to the high demands placed on by food consumers and our customers in the field of high quality of offered products and the safety of their use.

The farm is part of the regional biodiversity conservation center. In this area of engagement, it runs conservation collections of crops with high biological value (historical varieties of agricultural, vegetable and fruit plants). In cooperating organic farms, it also oversees collections of medicinal, herbal and melliferous plants. Similar works are carried out for the protection of rare and endangered plants.

The sphere of cultural heritage includes products decorated in a way characteristic for different cultural groups. The high quality of our products is appreciated by very demanding customers. Their valuable remarks make the farm's offer constantly replenished and the products are perfected.
