Stand for a bird feeder or insect hotel

Price	**23,50 Euro**
Availability	**Available**
Shipping time	**48 hours**
Manufacturer	**Cultural Farm BioDar**

Product description

A sturdy base for a bird feeder or an insect hotel.

Bird feeders can be hung from a branch or mounted on a stand. Large feeders require an especially strong support—which is exactly what our anchored stand provides. The steel anchor, which is driven 55 cm into the ground, ensures a stable mount for the feeder and prevents the wood from deteriorating, a common issue when wooden posts are placed directly into the soil.

This stand is also perfectly suited for small to medium-sized insect shelters (e.g., an insect hotel, size S).

Material:
The stand is constructed from pine wood, dried to an "air-dry" state. It features a galvanized steel anchor.

Dimensions:

Height: 120 cm
Width: 26 cm
Length: 26 cm
When the post is positioned at a 45-degree angle relative to the feeder, a feeder with a minimum width of 20 cm is sufficient.

Weight:
3 kg

Finish:
The wooden components are treated with a varnish that protects them against adverse environmental conditions (such as high humidity and microbial decay). The steel anchor is galvanized.

Color options: Pine (clear varnish) or dark brown.
The colors shown in the photographs may differ slightly from the actual product colors.

This product has additional options:

Color: Brown , Clear

Producer

Cultural Farm BioDar implements its mission using the rich scientific achievements of the Institute of the Heritage of Villages and Regions and extensive cooperation with non-governmental organizations.
The protection of natural and cultural heritage is an important sphere of the Farm's activities, and one of the basic goals is to preserve biodiversity and breeding useful organisms that can be used in agriculture and horticulture.

Since 1989, we have been implementing a program for implementing of bumblebees and solitary bees for horticulate practice and since 2012 the company has been running its own breeding of solitary bees on a commercial scale. By participating in the creation of biological progress, we respond to the high demands placed on by food consumers and our customers in the field of high quality of offered products and the safety of their use.

The farm is part of the regional biodiversity conservation center. In this area of engagement, it runs conservation collections of crops with high biological value (historical varieties of agricultural, vegetable and fruit plants). In cooperating organic farms, it also oversees collections of medicinal, herbal and melliferous plants. Similar works are carried out for the protection of rare and endangered plants.

The sphere of cultural heritage includes products decorated in a way characteristic for different cultural groups. The high quality of our products is appreciated by very demanding customers. Their valuable remarks make the farm's offer constantly replenished and the products are perfected.
