Product description

Summer house for bats - big

Observations conducted in Poland have shown that there are 14 species of bats inhabiting the houses, with 8 species choosing these shelters as places for their reproduction.

One of the most common and most-frequented boxes is the brown bat. He creates breeding colonies usually consisting of a dozen females. One can often see individuals in their cases - they are usually adult males.

Bats are not picky about the height of the box and they are willing to occupy those that are relatively low, e.g. 2-2.5 m above the ground. The presence of houses lures them even to the poor pine forests.

Material:
wood

Dimensions:

- height cm,
- width cm,
- depth cm.

Weight:
3.0 kg

Finish:
The house is painted with a wood impregnate that is harmless to bats.
It has hooks that allows it to be attached to a tree.

Colors:
pine (clear varnish) or dark brown
The colors in the picture may differ from the actual colors of the product.

This product has additional options:

Color: Clear , Dark brown

Producer

Cultural Farm BioDar implements its mission using the rich scientific achievements of the Institute of the Heritage of Villages and Regions and extensive cooperation with non-governmental organizations.
The protection of natural and cultural heritage is an important sphere of the Farm's activities, and one of the basic goals is to preserve biodiversity and breeding useful organisms that can be used in agriculture and horticulture.

Since 1989, we have been implementing a program for implementing of bumblebees and solitary bees for horticulate practice

and since 2012 the company has been running its own breeding of solitary bees on a commercial scale. By participating in the creation of biological progress, we respond to the high demands placed on by food consumers and our customers in the field of high quality of offered products and the safety of their use.

The farm is part of the regional biodiversity conservation center. In this area of engagement, it runs conservation collections of crops with high biological value (historical varieties of agricultural, vegetable and fruit plants). In cooperating organic farms, it also oversees collections of medicinal, herbal and melliferous plants. Similar works are carried out for the protection of rare and endangered plants.

The sphere of cultural heritage includes products decorated in a way characteristic for different cultural groups. The high quality of our products is appreciated by very demanding customers. Their valuable remarks make the farm's offer constantly replenished and the products are perfected.
